Yes, the mysteries of science and technology can be easily understood!
*Mark is the speaker or trainer a meeting planner or event organizer
needs to simplify them for any audience!*

Mark J. Blackman, PhD, CGBP, received his degree from Purdue University in Chemistry with more than forty years experience. He is a NASBITE Certified Global Business Professional and advises clients in the lucrative world trade of scientifically related products and services. His other areas of interest include biomass and coal technologies, synthetic fuel production from coal or biomass and alternative energies such as photovoltaic and thermal solar. He is also involved in the chemical aspects of environmental consulting and solving environmental problems. He has participated in the development of new chemical and medical instrumentation and advanced applications of existing devices. His most recent projects focus on providing biomass derived fuels for distributed electrical generation. He has recently been speaking to, and working with, Chambers of Commerce, as well as other civic and community groups, to promote careers in science. He presently offers technical event planning support and services for presentations, trainings and seminars.

ACADEMIC ACHIEVEMENTS

Doctor of Philosophy, Purdue University, West Lafayette, Indiana.

Bachelor of Science, Brooklyn College, Brooklyn, New York.

PROFESSIONAL AFFILIATIONS

American Chemical Society, American Physical Society, Institute of Electrical and Electronic Engineers, Association of Consulting Chemists & Chemical Engineers (Certificate 931), Chemical Consultants Network, The Chicagoland Chamber of Commerce, NASBITE, and other respected international business and scientific organizations.

PRESENT BUSINESS ACTIVITIES

PRESIDENT AND C.E.O.

MARK J. BLACKMAN, INC.

Dr. Blackman is the founder and president of Mark J. Blackman, Inc, a chemical consulting firm specializing in providing solutions to scientific and technical challenges in international commerce and scientific and technical business support, training program design and specialty event planning for clients.

SPEAKING AND TRAINING EXPERIENCE

Speaks to Local Civic Organizations to promote careers in science, instructed graduate, undergraduate and secondary courses in Chemistry. Trained scientists, technicians and technologists for industry, supported and aided in development of law enforcement training programs and presented in technical programs for sales and technical support. Has planned and contributed to scientific and technical events.

SELECTED ACCOMPLISHMENTS

Mark is internationally recognized for his accomplishments in business, scientific and technical development, course design and promotion of careers in science. He has appeared on nationally syndicated television as an expert advisor to business and international trade. His company has been recognized and selected by prominent members of the international electrical asset management community and related groups as a primary fuel and chemical consultancy. He is considered a leading expert in the chemical and general components of the critical area of distributed electrical generation using both traditional and alternative fuels and processes. He is respected for consulting, presentations, seminars, training and event planning in these specialties.
