**Yes, the mysteries of science and technology can be easily understood!**

**Mark is the speaker or trainer a meeting planner or event organizer  
needs to simplify them for any audience!**

Mark J. Blackman, PhD, received his degree from Purdue University in Chemistry and has more than forty years experience. He is also a NASBITE Certified Global Business Professional and advises clients in the lucrative field of exporting scientifically related products and services. His areas of interest include clean coal technologies, synthetic fuel production from coal or biomass and alternative energies such as photovoltaic and thermal solar. He is also involved in the chemical aspects of environmental consulting and solving environmental problems. He has participated in the development and support of new technologies, training methods and advanced applications of existing ones. His most recent projects focus on providing biomass derived fuels for electrical generation. He has recently been speaking to, and working with, local Chambers of Commerce, as well as other civic and community groups, to promote careers in science. He presently offers limited availability for technical and general presentations or seminars.

#### ACADEMIC ACHIEVEMENTS:

Doctor of Philosophy, Purdue University, West Lafayette, Indiana.  
Bachelor of Science, Brooklyn College, Brooklyn, New York.

#### PROFESSIONAL AFFILIATIONS:

American Chemical Society, American Physical Society, Institute of Electrical and Electronic Engineers, Association of Consulting Chemists & Chemical Engineers (Certificate 931), Chemical Consultants Network, The Chicagoland Chamber of Commerce, The World Trade Center Illinois, The International Speakers Network and other respected international business and scientific groups.

#### PRESENT BUSINESS ACTIVITIES:

*PRESIDENT AND C.E.O.*

*MARK J. BLACKMAN, INC.*

Dr. Blackman is the founder and president of Mark J. Blackman, Inc, a chemical consulting firm specializing in providing solutions to scientific and export challenges in industry and the laboratory, as well as relevant general business support and training program design to clients.

#### SPEAKING AND TRAINING EXPERIENCE:

Speaking to Local Civic Organizations to Promote Careers in Science, Instructed Graduate, Undergraduate and Secondary Courses in Chemistry, Trained Scientists, Technicians and Technologists for Industry, Supported and Aided in Development of Law Enforcement Training Programs, Presented in Technical Programs for Sales Support, Spoken for Political Purposes and acted as a Surrogate Speaker for Political Candidates.

#### SELECTED ACCOMPLISHMENTS:

Mark is internationally recognized for his accomplishments in business, scientific and technical development, course design and promotion of careers in science. His most recent publication is a contribution to the business anthology *One Great Idea Can Revolutionize Your Business* from Insight Press and he has appeared on nationally syndicated television as an expert advisor to business. In recognition of his lifetime of achievement, he has been selected for inclusion in the prestigious *Strathmore's Who's Who Worldwide*.
